Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

In view of applicant's amendment to the claims and arguments presented on 11/18/2004 following office action is final. All the rejections of record are incorporated here by reference.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by PINNAVAIA (US 5,866,645).

The discussion of the disclosure of the prior art of PINNAVAIA from paragraph 2 of the office action mailed on 8/20/2004 is incorporated here by reference.

In the response filed on 11/18/2004 the applicants have argued following:

a) Bridging is not equivalent to intercalation. Specifically the metal compound forms chemical link with the platelets of the clay.

With respect to the above argument, the examiner carefully reviewed the prior art and compared the process disclosed therein with the process of present invention. In prior art of

Art Unit: 1714

PINNAVAIA, clay component is treated with ammonium compound and with alkali metal or alkali earth metal to result in mixed organic/inorganic intercalated clay. In examples of the present invention, the applicants treat the clay component with metallic compound (example 3) and then so treated clay is utilized in example 5, where the applicants further treat it with ammonium. Applicants also have clay component intercalated with both organic and inorganic components. In both cases the polymer component is mixed with the treated clay and at the end results in intercalation.

The question that the examiner has is if after intercalation of the ammonium component is the clay actually bridged or do the chemical bonds between metal component and clay actually break, which would result in the process of PINNAVAIA. There is no clear indication that different products are made. The prior art of PINNAVAIA will be further reconsidered upon applicant's response.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1714

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
